Essay Writing

ENGINEERING GRADUATES; ARE
THEY JOB READY

In todays world, engineering is recognised as a discipline that opens opportunities and makes innovation and items that help make each of our lives easier. Nearly each and every perspective in our lives has some way or another been impacted by engineers f example the products that we create in factories for our use, the water we drink, the computers we use to search the stuffs on net, the buildings we live and the appliances and vehicles we use etc. Almost everything you use in daily basis. There is no limit what engineers can do.

Engineering is one of the fields that has the large impact of our problems in the world. As engineers, our goal is to change the world with new inventions and solutions that makes
